The LINC complex is fundamental in coordinating nuclear and cytoplasmic activities and its function/sequence is highly conserved during evolution. The cross talk between LINC proteins and chromatin remains vague.

In striated muscle, the LINC complex provides structural support to the myocyte nucleus and plays an essential role in regulating gene expression and mechanotransduction.

Generation and Analysis of Striated Muscle Selective LINC

The LINC complex exerts control over the transcriptome. Inducible expression of SUN1L perturbed the levels of a large number of mRNAs on the same substrate (Fig. 1B, Supplementary Tables 1 and 2; see also Spearman correlation plot in Supplementary Figure 1).

The LINC complex is essential for hearing. ... (SUN1), which localizes to the inner nuclear membrane (INM), are part of the linker of nucleoskeleton and cytoskeleton (LINC) complex in the nuclear envelope. ... Candidate genes were Sanger sequenced from genomic DNA using standard methods.

The LINC complex is essential for hearing

Figure 1. The LINC complex bridges the cytoskeleton and nucleoskeleton. The LINC complex is composed of KASH proteins in the outer nuclear membrane and SUN proteins in the inner nuclear membrane. The luminal region of SUN proteins forms a triple helical coiled-coil, allowing trimerization of their SUN domains.

LINC, a novel protein complex involved in the regulation

The LINC complex (Linker of Nucleoskeleton and Cytoskeleton) is a protein complex associated with both inner and outer membranes of the nucleus. It is composed of SUN-domain proteins and KASH-domain proteins. The SUN-domain proteins are associated with both nuclear lamins and chromatin and cross the inner nuclear membrane.

The methods in this class provide an implementation of the standard query operators for querying data sources that implement IEnumerable<T>. The standard query operators are general purpose methods that follow the LINQ pattern and enable you to express traversal, filter, and projection operations over data in any .NET-based programming language.
