Marrow - Wikipedia

Marrow is a type of summer squash, scientifically, known as Cucurbita pepo. It is typically green in color, somewhat like a fat zucchini. It has stripes, a soft skin, as well as soft flesh inside. Along with being a specific type of vegetable, it is also a catch-all term for a variety of thin ...

14 Amazing Benefits of Marrow | Organic Facts

Hematopoietic stem cell transplantation (HSCT) is the transplantation of multipotent hematopoietic stem cells, usually derived from bone marrow, peripheral blood, or umbilical cord blood. It may be autologous (the patient's own stem cells are used), allogeneic (the stem cells come from a donor) or syngeneic (from an identical twin).. It is most often performed for patients with certain cancers ...

x We attempted to develop an MRE11 IHC assay to appropriate standards for clinical use and to define the relationship of the biomarker to clinical outcome in a prospective analysis of retrospective tissue from two randomised trials. Staining was reproducible across centres with scoring less so, so we could not validate MRE11 as a robust, reproducible predictive biomarker of radiotherapy response.
